

REMARKS

By the present Amendment, claims 1-10 are cancelled and claims 11-20 are added. This leaves claims 11-20 pending in the application, with claim 10 being independent.

Substitute Specification

The specification is revised to avoid the objections raised in the Office Action and to eliminate grammatical and idiomatic errors in the originally presented specification. The number and nature of the changes made in the specification would render it difficult to consider the case and to arrange the papers for printing or copying. Thus, the substitute specification will facilitate processing of the application. The substitute specification will facilitate processing of the application. The substitute specification includes no "new matter". Pursuant to M.P.E.P. § 608.01(q), voluntarily filed, substitute specifications under these circumstances should normally be accepted. A marked-up copy of the original specification is appended hereto.

Claims

Original claims 1-10 stand objected to for containing informalities. By the present Amendment, the originally filed claims have been rewritten to avoid the language alleged to be informal in the Office Action. All language of the presently pending claims is now believed to be definite and provided with proper antecedent basis.

Since the claimed subject matter has been stated to be patentable, the record will not be burdened with a comparison of the claims and the cited patents.

Thus, this application is believed to be in condition for allowance. Prompt and favorable action is solicited.

Respectfully submitted,

A handwritten signature in cursive script, appearing to read "Mark S. Biggs", is written over a horizontal line.
